# Technology at work for you

## CONNECTING YOUR TRAINING TO THE TECHNOLOGY RESOURCES YOU NEED

Web-based training enables a teacher to distribute lessons, administer tests and offer guidance entirely through the Internet. Static methods involve a website with forms and dialog boxes, downloadable multimedia and email.

A more interactive approach invokes two-way communication with video and audio through the use of teleconferencing and streaming media.

## STANDARD TRAINING AVAILABLE

- AIRCRAFT FAMILIARIZATION.
- AIRCRAFT RECURRENT TRAINING.
- HUMAN FACTORS TRAINING.
- FUEL TANK SAFETY.
- EWIS (ALL TARGET GROUPS)
- AVSEC (GENERAL TRAINING)
- PART-M
- PART-145
- AVIATION LEGISLATION
- QUALITY MANAGEMENT (RECURRENT)
- TCAS II
- WINTER OPERATIONS
- DANGEROUS GOODS

## flexible solutions for your training needs

### CUSTOM TRAINING

Creating a better customer experience with customer training is vital for better adoption of services, tools and loyalty to an organization's offerings. At flightline we understand how to engage a disparate audience. We have helped organizations reach consumers globally in over 4 different languages and in multiple technological formats.

Actually we are able to develop custom contents to cover all your training requirements

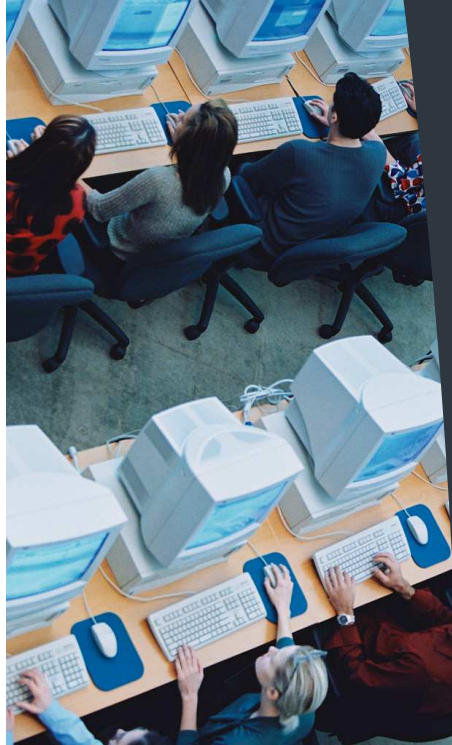

### TECHNOLOGY

Technology provides access to a customer at their point of need. Technology that easily delivers content designed for just-in-time scenarios provides consumers with relevant information that enhances their experience and establishes trust in a brand. The solutions in learning technology that bring customers mobile learning, video-based learning and bite-sized elearning modules generate an overall better customer experience.

## CUSTOMIZED TRAINING MATERIALS

Training materials can be created, corrected and used from anywhere in the world as long as a computer and a connection are available. Live interaction is also possible as long as student and teacher use the Internet at the same time. Web-based training costs nothing beyond the computer and Internet service,

## TRAINING CONSULTING PROVIDES A TOTAL END TO END SOLUTION.

### OWN AN LMS WITHOUT EFFORT

A learning management system (LMS) is software used for delivering, tracking and managing training and education; for example, tracking attendance, time on task, and student progress.

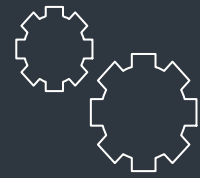

### WBT ADVENTAGES

Easy delivery of training to users opportunities for group training (asynchronous and synchronous) as well as individual training multi-platform capabilities (Windows, Mac, UNIX, PDA, phone, other wireless devices) easy updating of content

LMSs range from systems for managing training/educational records to software for distributing courses over the Internet and offering features for online collaboration. The creation and maintenance of comprehensive learning content requires substantial initial and ongoing investments of human labor. Effective translation into other languages and cultural contexts requires even more investment by knowledgeable personnel, **THAT'S WE DO FOR YOU**

### CUSTOM SOLUTIONS

You can take the advantage of our standard training or we can develop customized training also we can include material developed by your people.

### LMS SOLUTIONS
